IDENTITY SYSTEMS

S2K Identity Systems

Product Guide

About:

S2K Identity Systems is a leading manufacturer and wholesaler of premium modular aluminium and acrylic signage, wayfinding and display systems.

Beginning in the early 80's, the Melbourne-based company's Australian-made sign systems have a reputation for quality, longevity and flexibility.

Established for over 35 years, the company's product range has developed and grown over time. The products have maintained their contemporary appeal due to the clean lines, slim profiles and simplicity in design.

The company's manufacturing controls, maintained by long-standing employees with decades of in-house experience, provides reassurance for customers looking for quality and product flexibility.

S2K Identity Systems take pride in its architecturally designed signage and display systems, the high level of quality and its ongoing development of products for both the Australian and International markets.

Contents:

The Architectural
Modular Series

The Architectural Modular Series:

S2K Identity Systems AM Series signage system provides a uniquely modular approach to commercial and industrial signage.

This innovative sign system is comprised of three core components: the Base Plate, the Inserts and the Sidelocks. These may be arranged into a seemingly infinite array of designs with unlimited components, colours, sizes, mounting and graphic options, allowing Architects, Interior Designers and Sign Manufacturers optimal design flexibility.

AM Series components can be arranged into the precisely required configuration, producing signage of outstanding elegance, that is custom designed to suit your fit out, look and feel.

AM SERIES SIGNAGE IS DESIGNED FOR USE IN THE WIDEST OF COMMERCIAL AND INDUSTRIAL APPLICATIONS INCLUDING:

- Personnel
- Departmental
- Directional
- Directory
- Identification
- Wayfinding

THE AM SERIES ADVANTAGE

- Absolute design flexibility: offers total signage development flexibility.
- Slim and light construction: lightweight and durable aluminium.
- Slimline design (6mm in depth).
- Simple to use: requires no tools or clip devices to change information.
- Easy to maintain: durable aluminium construction requires no maintenance and is easy to clean.
- Cost reduction on updates: single Inserts can be easily updated without replacing the entire sign.
- Security feature: tamper proof locking option available upon request.

This is an overview of the Architectural Modular Series. The images included are just a selection of what can be achieved with the AM Series.

Design your own layout using our standard width and height dimensions listed on the following pg.

HOW THE AM SERIES WORKS:

S2K Identity Systems ingenious AM Series is based around only three components:

- The Base Plate
- The Inserts
- The Sidelocks

Component 01 - Base Plates

BASE PLATES

All AM Series signs have a Base Plate. The Base Plate is the backing panel for the sign. It has evenly spaced rails onto which the Inserts slide. The size of the Base Plate is determined by the width and the number of Inserts on the sign. S2K manufacture the Base to suit the requirements of each individual sign.
The Base Plate is always supplied in Satin Natural Anodised finish only.

AM Series directory board with a Poster Holder on the right hand side
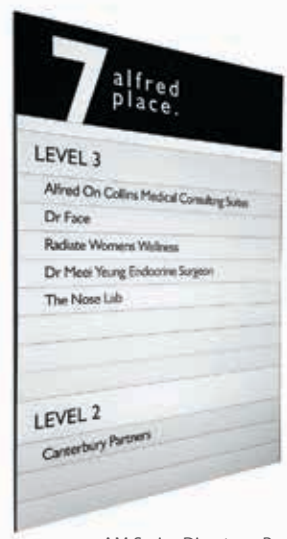

AM Series Directory Board with black anodised header

Component 02 - Inserts

INSERTS

Aluminium Inserts are offered in a wide range of sizes. They start at 21mm high and increase in increments of 21mm. For example - 21, 42, 63, 84, 105, and so on. The maximum height for a single Insert is 1197mm High. AM Series Inserts have a flat surface onto which your text and graphics can be applied.

SLIDER INSERTS

Slider Inserts differ from Inserts in that they have a channel on the face that allows the insertion of an acetate cover or a slider plate. A Slider Insert used with acetate permits the use of paper behind the acetate. Alternatively a Slider Insert accepts a slider plate used to cover or expose a message eg. Vacant/In Use, Open/Closed.

Slider Inserts are available in 2 sizes, 21mm (1.1) and 42mm (2.1)

Component 03 - Sidelocks

The unique AM Series Sidelock system provides a fast and effective means of fastening the Inserts and Base Plates together as a complete sign. Foolproof and simple, the AM Series Sidelock system is available in various widths and end finish profiles. A tamper proof version is also available.
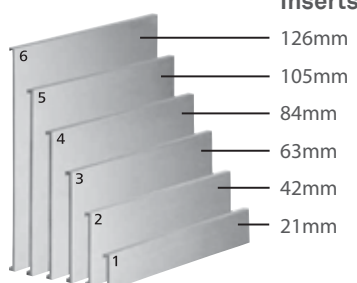

- Standard Sidelocks - 1.5mm are included on all AM Series signs.
- 6mm and 12mm options must be specified.
- 6mm and 12mm options are available with square or radius cut corners.
- Sidelocks are additional to Insert width measurements.

The AM Series offers designers the widest imaginable selection of sign mounting and installation options, graphic and text formats, and of course colours and finishes.

Panel Inserts

Any Insert that is 147mm or higher. Maximum height for a single Panel Insert is 1197mm.

Sizes are in increments of 21mm High.

189mm
168mm
147mm

Inserts

There are 6 standard Insert sizes. They are in increments of 21mm.

For Inserts higher than 126mm, refer to Panel Inserts.

Inserts

105mm
84mm
63mm
42mm
21mm
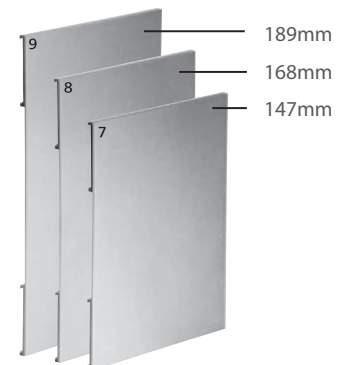

MOUNTING OPTIONS

- Wall mount
- Door mount
- Frame or stand
- Glass mounted
- Flag mount
- Desk stand
- Suspended
- Flag bracket – single or double-sided
- Workstation bracket – various

INSTALLATION METHODS

- Double-sided tape
- Silicone & other adhesives
- Concealed screw fixing
- Velcro
- Z-bracket
- Hinged

SUITABLE USES

- Meetings, conferences; timing or dates
- Staff identification
- Schedules
- Evacuation procedures
- Internal distribution information
- Workstation identification
- Opening hours
- Hospital/Patient identification
- Name plates
- Instructions
- Menus
- Price lists
- Phone extensions / lists
- Staff notices

GRAPHICS AND TEXT OPTIONS

- Vinyl cut graphics
- Digital prints
- Braille and Tactile graphics
- Silkscreen printing
- Engraving
- 3D lettering

FINISHES

Standard Finish
- Satin Natural Anodised Aluminium

Alternative Finishes for Inserts and Sidelocks
- New York Anodised
- Matte Black Anodised
- Matte Gold Anodised
- Painted – Single Pack or 2 Pack
- Mill Finish – suitable for painting

CUSTOM COLOURS

The AM Series Inserts and Sidelocks can be painted to your preferred colour. The Base Plate does not require painting.
We recommend single pack or 2 pack spray painting only. Do not powder coat the AM Series, as this finish is too thick for the slimline extrusion profiles.
S2K offers in house painting if required. Please specify your PMS for colour matching.

Bulletin
Board Series

Bulletin Board Series:

The Bulletin Board Series is a modular sign system designed to accommodate printed paper inserts.

They are designed to provide an efficient and effective means of displaying and interchanging graphic information with minimal investment of time or resources.

Computer generated graphics can be produced quickly and easily by the user, enabling signage to be amended or updated whenever required. The Bulletin Board Series is extremely easy to use, requiring no tools or clip devices to change graphic information.

HOW THE BULLETIN BOARD WORKS

The Bulletin Board is a frame system designed to accept printed paper inserts.

It consists of an aluminium C Channel frame, a non-glare acrylic cover and flexible grey End Caps.

The unit is side opening allowing the contents to be accessed from either side.

Note: The Bulletin Board Series is suitable for interior use only as it is not water proof.

HOW TO OPERATE

Simply slide the acrylic cover to one side, approximately halfway out of the unit; the flexible End Cap will simultaneously open. Remove and replace the paper insert by sliding it under the acrylic cover, then slide the acrylic back into its original position. The End Cap will spring back into place firmly securing the entire unit.

SIZES

The Bulletin Board Series is available in a variety of standard sizes, please refer to the size charts on pages 15 and 16 for detailed information. Custom sizes are available on request.

FINISH

- C Channel Frame – Satin Natural Anodised aluminium
- Cover – 3mm clear non-glare acrylic
- End Caps - flexible matte grey plastic

CUSTOM COLOUR

Painting - The C Channel aluminium section of the unit can be painted to your preferred colour.
All painting must be completed in house by S2K prior to assembly to maintain quality standards. Please specify a PMS code for colour matching.

Note: End Caps should only be painted if the unit will not be opened regularly, as paint will wear with frequent use.

OPTIONAL INSERTS INCLUDE

- Paper - white or coloured
- Light weight cardboard
- Clear acetate
- Photographic material

Only one piece of paper can be inserted at a time; do not attempt to insert multiple sheets.

Note: Please contact S2K Identity Systems if light weight cardboard or photographic material is to be used. These units require modification during manufacture for these thicker materials.

COMBINE THE BULLETIN BOARD WITH THE ARCHITECTURAL MODULAR SERIES

Due to the slim profile, the Bulletin Board can be integrated with the Architectural Modular Series. Combining the two systems enables the introduction of Headers, Footers or side panels, thus adding further options to your signage design, functionality and layout.

Please contact us with details of your preferred design.

Bulletin Board C4 with an AM Series sign on the left hand side

ORDERING & SPECIFYING

To order or specify a Bulletin Board please include the following:

1. Quote the code of one of the standard units in this   brochure
OR
2. For a design of your choice please nominate the following:
•   AM Series header (if required)
•   Size and code of chosen Bulletin Board   (Refer to sizes on pages 15 and 16)
•   AM Series footer (if required)

For more information please contact S2K directly.

MOUNTING & INSTALLATION

•   Wall mount
•   Door mount
•   Z Brackets - A4 size only
•   Desk stand
•   Workstation bracket – various
•   Double-sided tape
•   Silicone adhesive
•   Counter sink screw fixing
•   Velcro

These options are subject to the size and the weight of the unit. For more information please contact S2K directly.

SUITABLE USES

•   Meetings, conferences; timing or dates
•   Staff identification
•   Schedules
•   Evacuation procedures
•   Internal distribution information
•   Workstation identification
•   Opening hours
•   Hospital/Patient identification
•   Name plates
•   Instructions
•   Menus
•   Price lists
•   Phone extensions / lists
•   Staff notices

SIZE GUIDELINES

The diagrams to the right are indicative of the
selection of   options available.
There are many more options possible, please contact
us with your preferred design.

Width Increments are multiples of 52.5mm
Height Increments are multiples of 21mm

Smallest Size available is 105mm Wide X 63mm High.
Largest Size available is A4 – See size diagrams on
pages 15 and 16 for more details.

Please add 3mm to the overall width of the listed
sizes. This allows for Sidelocks and/or flexible
End Caps. Actual paper sizes will be different to sign
sizes.
For sizes A4 and larger, please refer to our Poster
Holder Series.

Poster Holder
Series

Poster Holder Series:

The Poster Holder Series is a slimline framing system designed for posters and other printed material.

The Poster Holder is designed to provide an efficient and effective means of displaying and interchanging graphic information or posters with minimal investment of time or resources.

Posters and computer generated graphics can be produced quickly and easily by the user, enabling inserts to be amended or updated in house whenever required.

HOW TO OPERATE

The Poster Holder consists of an aluminium backing panel, a grey U channel frame at the top and the bottom, a clear non-glare acrylic cover and grey End Caps.

To change a poster, simply lift the acrylic cover off in an upward motion and remove the existing paper insert. Place the new insert in behind the poster clips then replace the acrylic cover.

As the Poster Holder is top opening, you must allow a 20mm clearance above the installed unit for access.

A tamper proof option is available on request.

NOTE: The Poster Holder Series is suitable for interior use only as it is not water proof.

Poster Holder A3 Portrait
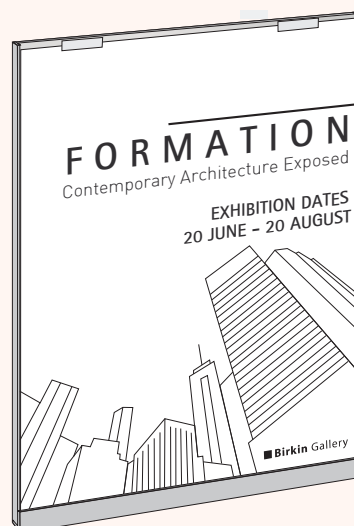

Lift cover upwards to open

Poster Holder A2 Portrait

SIZES

The Poster Holder Series is available to suit the following standard paper sizes:

A4   A3   A2   A1   A0

Both Portrait and Landscape options are available in all sizes; please specify which one you require. See page 23 for layouts.

CUSTOM SIZES

The Poster Holder is available in any custom size provided it is in between A4 and A0.
A0 is the largest size we manufacture.

For non-standard sizes please specify one of the following:

• The paper size you wish to accommodate
• The outside to outside dimensions of the entire unit
• Custom sizes do not incur penalty charges

Poster Holder A4P mounted to a Desk Stand

COMBINE THE POSTER HOLDER SERIES WITH THE ARCHITECTURAL MODULAR SERIES

The Poster Holder Series can be used alongside the AM Series. Combining the two systems enables the introduction of headers, footers or a directory board, thus adding another dimension to your signage options.

OPTIONAL INSERTS

• Paper - white or coloured
• Light weight cardboard
• Clear acetate
• Photographic material

Only insert one piece of paper at a time. Do not attempt to insert multiple sheets.

ORDERING & SPECIFYING

To order or specify the Poster Holder Series please include one of the following:

• Quote the code of one of the standard units
• For Custom sizes, include details of paper size or outside to outside dimensions

FINISH

• Backing panel – Aluminium
• Frame – Grey plastic
• Cover – Non-glare acrylic

CUSTOM COLOURS

The Poster Holder frame can be painted to your preferred colour.
All painting must be completed in house by S2K prior to assembly to maintain quality standards.
Please specify your PMS for colour matching.

Poster Holder A3 Landscape

MOUNTING & INSTALLATION

- Wall mount
- Door mount
- Z Brackets
- Desk stand - for A4 and A3 sizes recommended
- Workstation bracket – various
- Double-sided tape
- Silicone adhesive
- Counter sink screw fixing
- Velcro

These options are subject to size and weight, client to specify

SUITABLE USES

- Meetings or conferences; timing or dates
- Promotional material
- Schedules
- Evacuation procedures
- Internal distribution information
- Opening hours
- Hospital / Patient Information
- Instructions
- Menus
- Price lists
- Phone extensions
- Staff notices

FEATURES & BENEFITS

- The Poster Holder is a top opening unit
- Extremely easy to use
- Perfect for frequent graphic changes
- No tools or clips required to change graphics
- There is a security option available in the form of a small grub screw; this will help secure the unit when higher security is required

SIZE GUIDELINES

The diagrams to the right are a selection of the options available. Please contact us with your alternative designs.
Please add 3mm to the overall width of the above sizes. This allows for Sidelocks and or the flexible End Caps. Actual sign sizes will differ to paper sizes. For exact dimensions, please contact S2K Identity Systems.

For sizes smaller than A4, please refer to the Bulletin Board Series.

Paper Hanger
Series

Paper Hanger Series:

Based on the "gravity principle", the Paper Hanger Series utilises an aluminium extrusion with internal rods that grip and hang paper for display purposes.

The Paper Hanger Series is ideal for notes, messages, architectural plans, displays, posters or boardroom presentations.
It can be attached directly to any clean, flat surface using double-sided foam tape.
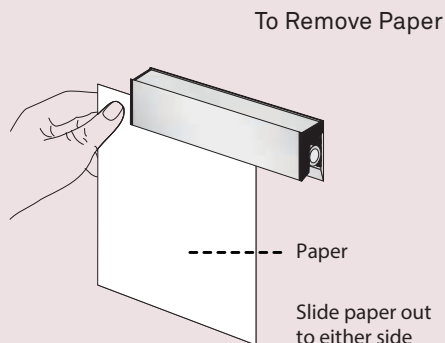

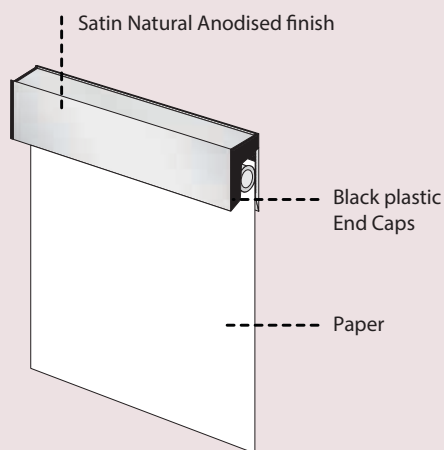

HOW TO OPERATE

Paper is easily inserted in behind the aluminium rods and is gripped in place through gravity and the grooved surface within the extrusion.
To remove, take the bottom of the paper and lift it up and away from the wall or substrate. Alternatively, slide the paper out sideways to the left or the right.
The Paper Hanger is designed to accept one piece of paper at a time. Do not put more than one piece of paper in the same section. However, individual pieces of paper can sit side by side when longer lengths are used.

SIZES

The Paper Hanger Series is available in lengths up to 1900mm. It can be cut down to your required size.
Longer lengths can be achieved by removing the black End Caps and butt-joining 2 or more lengths together. End Caps are only required on the extreme left and right of the finished Paper Hanger to secure the rods.

Satin Natural Anodised finish

Black plastic End Caps

Paper

Braille3D

Braille3D:

S2K Identity Systems offer a range of Braille and Tactile signage – Braille3D.

01.

02.

BRAILLE SIGNS

Braille and Tactile Signage is a requirement of the Australian Building Code section D3.6.
Signage must meet Australian Standards section 1428.
All signage of this type must have both the tactile elements —
i.e. symbol or text, as well as Braille. Just one or the other render the signs non-compliant.
Both elements MUST be included in all signage to assist both the blind and the visually impaired.

Braille and Tactile Signs are required for:

• Sanitary facilities
• Accessible areas
• Public Areas
• Room identification
• Area identification
• Exit Levels
• Level Access

ACCESSIBLE SIGNS

Any sign that includes the Accessible Symbol MUST have an Ultramarine Blue background with white symbols and white raised text as per International Standards.

BRAILLE3D APPLIED TO THE ARCHITECTURAL MODULAR SERIES

Braille3D can be laminated directly to the Architectural Modular Series if interchangeability is required.

SIZES

We offer a range of standard sizes. Please request our stock list for more information.
Custom sizes and colours are available upon request.

FINISH

Colours of our standard stock range:

• White on ultramarine blue background
• Black on silver background

Custom colours are also available for either the background or raised symbols and letters.
Please specify 3M Colour or PMS Colour. Suited to quantities only.
All Braille3D standard signs are printed directly to various substrates.

MOUNTING & INSTALLATION

Braille3D Signs can be installed with double-sided tape.
Braille signs should be mounted adjacent to a door if possible.

FEATURES AND BENEFITS

- Compliant with Australian Standards
- Standard stock range offered
- Easy to clean
- Simple to install
- Durable

03.
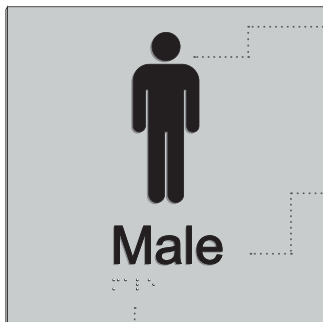

- Symbol must be raised
- Symbol must have rounded edges
- Colour must be a strong contrast to the background colour

- Sign must include text
- Text must be raised
- Text must be centered if a single word, otherwise left justified
- Colour of text must be a strong contrast to the background colour

04.

- Braille must be Grade 1
- Braille must be left justified to text
- Background colour must be a strong contrast to the raised symbol and text

InfoStrip
Series

InfoStrip Series:

InfoStrip is a ticket strip extrusion that is suitable for labelling shelves, pigeon holes, drawers, cupboards, filing cabinets, display cabinets and much more.

InfoStrip can be used with a paper insert alone or combined with an acetate cover for added protection and a more professional finish. InfoStrip is suitable for Interior use only. It is not water tight.

01.

02.

SIZES

- InfoStrip is available at a height of 16mm only
- Maximum length available is 2000mm (2mt)
- InfoStrip can be cut to any length

OPTIONAL INSERTS

- Paper - white or coloured
- Clear acetate - maximum length of acetate is 1000mm (1mt)
- Perforated paper sheets are available from S2K, the maximum width of sheets is 210mm

FINISH

- Satin Natural Anodised Aluminium
- Colour option - InfoStrip can be painted if required. A suitable undercoat must be used prior to painting
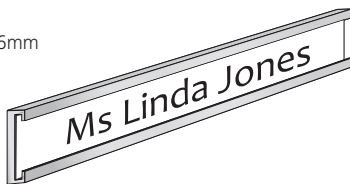

MOUNTING & INSTALLATION

- Pigeon hole mount
- Wall mount
- Door mount
- Shelf mount
- Double-sided tape

InfoStrip can be supplied complete with double-sided tape on request.

SUITABLE USES

- Pigeon hole labelling
- Staff identification
- Shelf labels
- Drawer labels
- Workstation identification
- Hospital / patient identification

Archi-Frame
Series

Archi-Frame Series:

Archi-Frame is a simple framing system that allows the user to showcase their printed graphics whilst also being able to change them as often as needed.

Archi-Frame is a powder coated aluminium frame with a clear flexible polycarbonate cover.

Archi-Frame is designed to provide a flexible and cost-effective means of displaying and interchanging graphic information with minimal investment of time or resources.

Graphics can be produced quickly and easily by the user, enabling signage to be amended or updated whenever required.
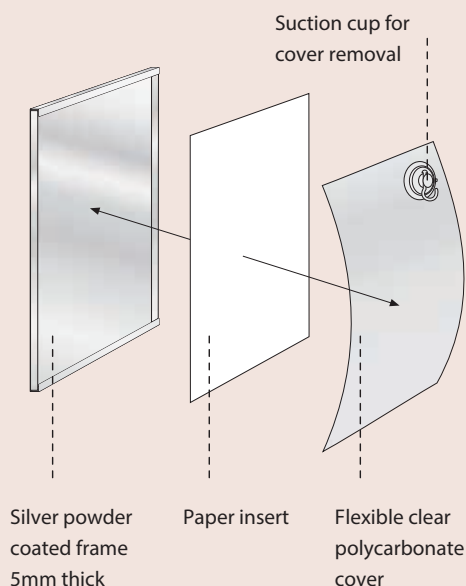

HOW TO OPERATE

Simply remove the clear flexible cover with the suction cup provided, change or insert the printed paper, then replace the clear cover.

Archi-Frame is suitable for interior use only. It is not water tight.

SIZES

Archi-Frame is available to suit the following standard paper sizes:

- A3 portrait & A3 landscape
- A4 portrait & A4 landscape
- A5 portrait & A5 landscape
- A6 portrait & A6 landscape

COMBINE THE ARCHI-FRAME SERIES WITH THE ARCHITECTURAL MODULAR SERIES

Architectural Modular Series can be combined with the Archi-Frame if it requires the inclusion of a header, footer or a directory board. Combining the two systems increases the functionality of your chosen signage options.

Vertex Series

Vertex Series:

Vertex Series is an interchangeable panel system. The channel frame is designed to accommodate Panel Inserts in a variety of materials making it easily updatable, accessible and cost effective.

This system is suitable for wall mounted, ceiling suspended and projecting mounted signs. It is designed to be lighter and easier to update than other systems of its kind.

The Vertex Series channel frame can accept a variety of standard sheet materials thus offering you more choice with your design and graphic options.
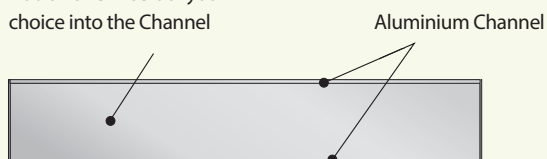

The flexible End Caps make it simple to slide the sheet material in and out of the frame.

HOW TO OPERATE

To interchange the Panel Inserts, simply slide the panel out to one side and the End Cap will flex open enabling removal. Repeat in reverse to replace the new Panel Insert. The End Cap will automatically close once the panel is in place.

SIZES

Vertex Series is available in the following sizes:

Channel Height Options:

- 80mm, 100mm, 120mm, 150mm, 180mm

Channel Width Options:

- 450mm, 550mm, 650mm, 750mm, 900mm,
- 1100mm, 1300mm, 1500mm.

Multiple Inserts - just add as many channel sections as you require.

OPTIONAL INSERT PANELS

- Aluminium Plate 1 - 2mm thick (From S2K)
- Clear Acrylic 1 - 2mm thick (From S2K)
- Coloured Acrylic 1 - 2mm thick (By Others)
- Alucobond 1 - 2mm thick (By Others)
- Stainless Steel 1 - 2mm thick (By Others)
- Or any other sheet material of above thickness
- Choose your preferred panel material
- If side access is limited we recommend you use flexible material for your Insert Panel

Single Channel

Add a Panel Insert of your choice into the Channel
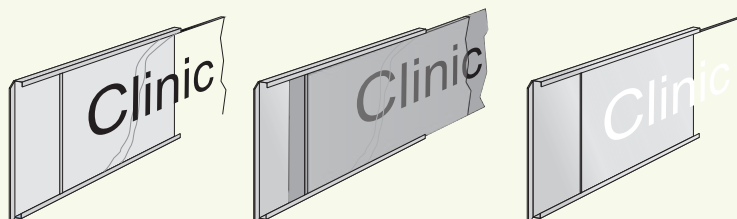

Aluminium Channel

Insert Panel of your choice

- Acrylic
- Aluminium
- Stainless Steel
- Alucobond

Multiple Channels

Slide panel Insert in or out to change

For multiple Panel Inserts, simply add as many Channels as required

FINISH

- Frame - the C Channel aluminium frame is Satin Natural Anodised
- End Caps - grey (flexible plastic)
- Painting - both the frame and the end caps can be painted if required

MOUNTING & INSTALLATION

- Wall mounted
- Suspended – single or double-sided
- Flag mount – projecting mount
- Stainless steel braided wire for suspended signs
- Adjustable ceiling mounts
- Double-sided tape
- Silicone adhesive
- Counter sink concealed screw fixing

Method of attachment to the ceiling to be advised by the sign installer. Various connectors are available.

SUITABLE USES

- Wayfinding
- Directional signs
- Public information
- Area identification
- Door signs
- Corporate or retail signage

Magnetic
Sign Series

Magnetic Sign Series:

The Magnetic Sign Series is a slimline interchangeable sign system. It is suitable for a range of applications. The changeable Inserts are accessed from the front, simple to change and update. The front access makes this sign series a great choice for areas with limited access.

Magnetic signs are available with both single and multiple Inserts. Graphics, text or digital prints can be applied directly to the face of the removable aluminium Inserts.

The aluminium frame is designed to accept single or multiple aluminium Inserts that can be interchanged if required.

The frame is available in a 2 sided and a 4 sided option.

HOW TO OPERATE

Simply attach the custom removal tool to the Insert you wish to remove. Pull the Insert towards you using the tool, the Insert will release from within the frame. To replace, simply slip the Insert into position within the frame.

SIZES

The Magnetic Sign Series is flexible in its design, thus offering many sizes and layouts.

Insert Height Options:

- 21mm, 42mm, 63mm, 84mm, 105mm, 126mm, 147mm, 168mm, 189mm, 210mm……….increasing in multiples of 21mm to a maximum single Insert height of 1197mm

Sign Width Options:

- 150mm, 200mm, 250mm, 300mm, 400mm, 450mm 500mm, 550mm,   600mm, 650mm, 750mm, 800mm, 900mm, 1000mm, 1100mm, 1200mm

Custom Sizes are available on request.

Workstation
Sign Series

Workstation Sign Series:

The Workstation Sign Series is designed for labelling workstations and other areas within the work environment. This sign series makes updating names, labels and graphics easy, cost effective, time efficient and streamlined. This system was designed with the end user in mind.

Workstation signs are available in a variety of sizes, formats and styles.

S2K custom manufacture aluminium workstation brackets to suit a wide variety of workstation screens and screen caps. As each screen system is different, so are the brackets.

The brackets are simple to mount over the top of a screen or alternatively they slot into the screen cavity.

The brackets enable the signs to be quickly and easily removed and replaced in another location quickly and conveniently. Brackets can be attached to a wide variety of signs. Simply choose the sign system that best suits your needs, and then choose the desired bracket.

C CHANNEL NAMEPLATES

The C Channel Name Plates are one option in the Workstation Sign Series. The C Channel is Satin Natural Anodised aluminium. There are 2 Insert options available for this system.

- **Clear cover** - Print your own graphics on paper and insert behind the cover or apply vinyl graphics to the reverse side of the clear cover
- **Aluminium plate** – Apply vinyl graphics directly to the face of the aluminium plate

SIZES

C Channel Heights:
- 21mm, 42mm, 63mm, 84mm, 105mm, 126mm

WORKSTATION A4 & A3 INSERT SIGNS

The A4 & A3 Insert Signs form part of the Workstation Sign Series.
These signs comprise of a 3 sided slimline aluminium frame and
a clear cover.

There is open access at the top of the sign where printed paper
can be inserted. The paper sits in between the aluminium frame
and the clear cover.

Print your company logo, staff or location name to use the sign
for staff ID as well as company branding.

The clear cover can also be used like a whiteboard. Simply
write on the cover with a whiteboard marker. Remove with a
whiteboard duster or smooth cloth.

HOW TO OPERATE

Insert your printed paper in behind the clear cover. Only use a
whiteboard marker to write on the clear cover. Use a clean cloth
to remove the marker.

SIZES

The Workstation A4 & A3 Insert Sign Series is available in the
following standard sizes:

* A4 portrait
* A4 landscape
* A3 portrait
* A3 landscape

**Custom Sizes are available on request. Please nominate the
size you require.**

FINISH

* Frame - Satin Natural Anodised Aluminium
* Cover - clear plastic

MOUNTING & INSTALLATION
