

# fabricate3D

## FABRICATE3D

**fabricate3D** is a unique metal fabrication service available from S2K Identity Systems.

We can create intricate 3 dimensional, prismatic and curved faced designs adding a new dimension to corporate identity, branding or signage, with literally no limitations in design.

This precision welded fabrication is available in a wide range of materials and superb finishes.

Many designs that were previously too complex and could not be manufactured with metal are now possible with fabricate3D.

## POSSIBLE USES

- Reception signs
- Corporate identity
- Company logos
- 3D letters
- Crests
- Directory frames
- Exterior building ID
